

Adipocere

Alba, Martin

Chua, Jienzel

Adipocere is a zombie survival rogue-like game, wherein you play as two robots sent by humanity to eradicate the virus that created the zombie apocalypse. You gain currency as you defeat more zombies, and use said currency in between waves to boost your character's strength.

Controls:

- A = move left
- S = move down
- D = move right
- W = move up
- Left Mouse Click = shoot/buy power-ups
- Hold Shift while moving = sprint
- Q = open shop (only in between waves)

You and your partner will be given basic weaponry to defeat waves of enemies. Use the mouse to aim at the enemy and fire using the left mouse button. Once the wave is completed, press Q to open the shop and buy power-ups.

Power-Ups:

- Health Potion = increases the max HP a player can have
- Speed Potion = increases the movement speed of the Player
- Reload Potion = increases the firing rate of the gun
- Medkit = replenishes the player's health
- "Pack a Punch" = upgrades the current gun

Weapons:

- Slingshot = higher damage but slower reload speed
- Bow = slightly increases reload speed and damage
- Rifle = greatly increases reload speed and slightly increases damage
- Sniper = greatly increases damage and slightly increases reload speed

Once you buy the power-ups, you can wait for the timer to count down before continuing the wave. The game is endless and you can keep upgrading your player until you are undefeatable.
